

# **CECIL COUNTY**

# **KENT COUNTY, MARYLAND**

## ***REFERENCE TIDE GAUGE - TOLCHESTER BEACH***

The Tolchester Beach tide gauge is located in western Kent County.

High tide at Charlestown (Cecil County) occurs about 3¼ hours later than the high tide at Tolchester Beach. Low tide is around 3½ hours later.

Historically, in Cecil County and Kent County moderate to major tidal flooding has only occurred with a southerly flow. Northeasters tend to produce minor tidal flooding at most in the two counties.

### ***Cecil County***

#### **In the lower part of the moderate range:**

Flooding occurs in Charlestown along the North East River.

### ***Kent County***

#### **In the upper part of the minor range:**

Flooding begins in Rock Hall, Skinners Neck, Piney Neck, McKinleyville and Cliffs City.

Flooding occurs along the Chester River in Chestertown and also south of Chestertown along Quaker Neck Road.

### ***Data Acquisition***

In order to access data from the Tolchester Beach gauge, use the National Ocean Service web site at <http://tidesonline.nos.noaa.gov/>.
